

B-BLUE

BUILDING THE BLUE BIOTECHNOLOGY COMMUNITY IN THE MEDITERRANEAN

1,5 M €

Project
budget

1,3 M €

ERDF / IPA

22 Months

Project
duration

The Mediterranean Sea is a biodiversity hotspot with a massive potential for using the organisms, their products and the infrastructure to produce new products and processes for food, feed, healthcare and well-being, energy and other sectors. This is enabled by the growing field of blue biotechnology which can unlock the innovation potential and contribute to the economic growth and prosperity. B-Blue will define a transnational community that will jointly design the implementation strategies of blue biotechnology in the whole Mediterranean region.
